

Motivational Letter

Dear Scholarship Committee,

I am writing to express my strong interest in the Africa Applied Data Analytics Bootcamp and to apply for scholarship support for the program. I am highly motivated to participate in this opportunity because I believe it will significantly enhance my technical, analytical, and professional skills in data analytics and data-driven decision-making.

I have a background in Mathematics and I am currently pursuing postgraduate studies in Information Technology and Financial Engineering. Over the years, I have developed strong analytical and problem-solving skills through academic work, teaching, research, and technology-related projects. As a lecturer with several years of experience, I am passionate about empowering students and young professionals with practical knowledge that can help them succeed in today's digital world.

My interest in data analytics comes from my desire to use data and technology to solve real-world problems, especially in education, research, and institutional development. I have practical experience with tools such as Python, Excel (including Power Query), Power BI, Linux, and database systems, and I am continuously improving my skills in modern technologies and artificial intelligence applications.

Joining the Africa Applied Data Analytics Bootcamp will provide me with the practical exposure, mentorship, and collaborative environment needed to strengthen my expertise in data analytics. I am particularly excited about learning from experienced professionals, working on practical projects, and engaging with other passionate learners across Africa. I believe this program will help bridge the gap between academic knowledge and industry practice.

Receiving scholarship support will greatly reduce the financial burden associated with the program and allow me to fully focus on learning and contributing meaningfully throughout the bootcamp. More importantly, the knowledge and skills I gain will not only advance my career but will also positively impact my institution and community. I intend to share the knowledge gained through teaching, mentorship, and collaborative initiatives that encourage data literacy and innovation among students and young professionals.

I am confident that my academic background, professional experience, commitment to learning, and passion for community impact make me a deserving candidate for this scholarship opportunity. I am eager to contribute actively to the program and make the most of every opportunity it provides.

Thank you for considering my application. I look forward to the opportunity to participate in the Africa Applied Data

Analytics Bootcamp and contribute positively to the learning community.

Sincerely,

Hamza Abdullahi
