

Dear Selection Committee,

I am UWAMAHORO Gisele, a Bachelor's student in Applied Mathematics, and I am excited to apply for the Africa Applied Data Analytics Bootcamp scholarship.

I became interested in this program after some of my colleagues who previously attended DATAPLUS training shared the skills and knowledge they gained in data analytics. Hearing about their experience made me curious and motivated to also learn more about Python, SQL, Power BI, and AI tools.

I believe this bootcamp will help me build practical skills, grow professionally, and prepare for future opportunities in technology and data-driven problem solving. As a student, I currently face financial limitations, so scholarship support would greatly help me access this valuable opportunity.

I am hardworking, committed, and ready to actively participate in all sessions throughout the program. Thank you for considering my application. I would be honored to be part of this bootcamp and use the knowledge gained to positively impact my future career and community.

Sincerely,
UWAMAHORO Gisele
